

Liquid barrier

Benefits

- With condensate trap for visual inspection - easy to drain
- Compact, robust design made of high-strength, weather-resistant plastic
- Compatible with hoses with 4/6 mm inside diameter
- Tightness-tested
- Mounting bracket for easy and fast installation
- AFRISO quality product – manufactured in Germany

Application

For increased reliability and for the protection of vacuum type leak detectors.

Versions

	Part no.
Liquid barrier	43646

Blue part no. = in-stock items

Description

Liquid barrier with condensate trap for visual inspection, complete with fixing bracket for easy mounting to manhole cover. The liquid barrier is mounted directly into the suction line between the leak detector and the double-walled tank. The liquid carried in the suction line (condensate or, in the event of a leak, the medium or groundwater) is collected in the condensate trap of the liquid barrier. An integrated float shuts off the suction line if too much liquid is contained in the liquid barrier. The condensate trap can be easily unscrewed for emptying. Tightness-tested, compact, robust design made of high-strength plastic, compatible with hoses with 4/6 mm inside diameter
