

## Modular extension sets in system case S

**CAPBs®  
water set ADS-WS**

**Application** Water set for pressure tests at water pipes with test medium water. Consisting of pressure transmitter CAPBs® sens PT 70 (25 bar), test plug 1/2" with plug-in nipple, T connector with 2 quick-action couplings and adapter for compressor connection in system case S.

**CAPBs® set  
heating system  
check 2.0**

Sensor module pressure/temperature CAPBs® sens FP 10 with Pitot tube and surface temperature probe in system case S for measurement of the flow rate and determination of the temperature in the residual core flow of the flue gas line. The measured data is used to calculate the ventilation loss. If the channel cross section is known, it is possible to calculate the volume flow. The measurement results of the surface temperature probe serve as the basis for calculating the surface loss of the heat generator.
