

## CAPBs® set for tightness test DPK 60-6 sens

### Benefits

- Starter set for professional tightness tests with the wireless CAPBs® sensor modules
- CAPBs® sensor module pressure (6 bar) suitable for CAPBs®-enabled measuring instruments of the BlueLine series with Bluetooth® Smart technology
- Robust, modular system case M "DPK", suitable for box and shelf system Sortimo-BOXX
- Can be used in conjunction with AFRISO BlueLine measuring instruments, smartphones or tablets as evaluation units

### Application

For pressure tests as per DVGW worksheet G600. Suitable for tightness tests (150 mbar) and load tests (1 bar) on gas pipes and for checking the connection and flow pressure as well as the pressure loss. Can also be used for tightness tests (150 mbar) and strength tests (3 bar) on drinking water pipes as per ZVSHK (German Central Association of the HVAC Industry). Ideal for acceptance tests of heating system pipes, solar system pipes, underfloor heating systems, liquid gas pipes and oil pipes.

## Technical specifications

### Measuring range

-1/+6 bar

### Dimensions (W x H x D)

Sensor module: 42 x 74 x 35 mm

Case: 367 x 72 x 316 mm

### Scope of delivery

- Sensor module pressure CAPBs® sens PS 40, 6 bar, connection Ø 8 mm
- Pressure test valve with quick-action coupling and high-precision adjustment valve
- Hand-operated bulb pump with valve and connecting hose
- 2 conical test plugs for pipe diameter ¾" – 1¼" with plug-in nipple
- Y connector (2 x quick-action coupling, 1 x plug-in nipple)
- Connection hoses with plug-in nipple and quick-action coupling
- Modular system case M "DPK"
