

# Volume flow/temperature measuring instrument FlowTemp

Also available as CAPBs®

- + Fast, easy determination of the temperature per water volume
- + Selection of measuring range for the volume flow measuring by means of a disc with different holes

**Application** For checking and adjusting water heaters. FLOWTEMP is held under an open water tap and indicates the water temperature reached at the corresponding flow rate.

**Technical specifications**

**Measuring ranges**  
1.6 up to 4 l/min  
4 up to 8 l/min  
8 up to 16 l/min

**Scope of delivery**  
Instrument with robust plastic enclosure to protect against dirt, impact and shock
